

Union Labor Information

Las Vegas has several unions. It is important to know which services are provided by each to order labor appropriately. Below is a quick guide to assist with Union Labor questions. As an exhibitor you can assemble equipment that your company manufactures or distributes if the work will take place under 12 feet high. Any work done outside of this must be done by a labor union worker. For more information use this link to access the [Show Site Work Rules](#) and the [Scope of Work Rules](#).

All Exhibitors performing work in a booth must be an employee of the exhibiting company. If the work falls under the scope of a Union you will be required to show proof that you work for the company, and proof that your company manufactures or distributes the products being displayed. If you are unable to provide sufficient documentation GES will provide the labor to complete the work at the Exhibitors expense. Please note: Business cards are not considered sufficient for proof of employment.
